

# Why SMB's Need Public Health Consultants

THE BIA  
COLLABORATIVE

*bia*

## EMPLOYER TAKEAWAYS

Having a fresh perspective can help give you insight from a non-biased opinion.

This is an opportunity for you to delegate. Allow the experts to do their job.

Prioritize the health of your employees or they will navigate to an organization that does.

## OUTSIDE PERSPECTIVE

This gives you a fresh outlook on problems you need to solve from a health professional who is not jaded by other responsibilities.

## EVALUATE PROCESSES FOR EFFECTIVENESS

Public health consultants can get granular in their approach of analyzing your processes in order to identify gaps and create solutions.

## SPECIALIZED EXPERTISE

Public health consultants can identify needs and find solutions that speak directly to those needs. Consultants can also educate leadership and provide a long-term plan leading to sustainable results.
